

# ANGEL HANDLE

SAFETY DEVICE PREVENTING  
PASSENGERS FALL

## **BEST VALUE FOR SAFETY**

Angel Handle is an affordable security device that quickly and easily secures chairlifts in order to avoid passengers to slip under the restraining bar, and makes it easier to close.

GROUP

MADE IN FRANCE

## **QUICK AND EASY TO INSTALL:**

The Angel Handle is quick and easy to install on any new or existing chairlifts thanks to its aluminum gripper jaw system suitable for most of the restraining bar on the market.

No drilling is required to install the handle, so the chairlift sustains no structural damage in the process.

Coupling torque to respect:  
5 N.m / 3.68 ft-lbs

Anodised aluminum gripper jaws + grid

Fits ø 22 to 30 mm restraining bars

ABS Shockproof

Easy grip to close the restraining bar

Weight:  
439 g / 0,97 lbs

## **HOW DOES IT WORK?**

The Angel Handle is placed in front of each seat to ensure that every passengers have a security device between their legs, preventing them to slip under the restraining bar. The handle also makes it easier to close the restraining bar.
